PROJECTS

- Personality test using C#**

Made this project on Visual Studio, and it was a personality test with questions based on the OCEAN methodology with different options, and it showed the personality type of the player after all the questions were answered.

- Insurance Website using NodeJs, ReactJS, Bootstrap, MongoDB and MVC Framework:**

Developed an online insurance website with the help of MVC framework, RESTful technologies, server with NodeJS, front-end development with ReactJS and Bootstrap.

- E-Commerce Website using ASP.NET Core MVC, Entity Framework, and Identity Framework**

To create a complete e-commerce website, I used the ASP.NET Core MVC framework, together with Entity Framework and Identity Framework and used Microsoft SQL Server Management Studio to create the database.

- **Final Year Project – Tele-Healthcare Application with MERN Stack**

This project was made on Visual Studio Code, and it had features such as online consultation with doctors, pharmacy store, adding home remedies section, and a BMI Calculator with **NodeJS** server and a **ReactJS** frontend provided with **MONGODB** database.
